

Whitewater Canal Trail
P.O. Box 126
Brookville, IN 47012

Trail Supporters,

I feel that the proposed Whitewater Canal Trail is a wonderful means of preserving the historic history and character of Southeastern Indiana and Franklin County. These 8 miles of trail preserve the history of transportation and engineering feats of our State. The land needed to accomplish this trail is mostly owned by the State of Indiana and will only enhance the uniqueness of our area.

This stretch of trail between Brookville and Metamora will be a wonderful means of safe healthy activity for all individuals and families and further help the interest and maintenance of the Canal and Aqueduct in Metamora.

Governor Ray a resident of Franklin County in 1820 built his residence on 10th and Franklin Streets. In the year 1825 he was Governor of Indiana and held that office until 1831. As a public official of Indiana he helped to form the Transportation Enhancement Act and the Whitewater Canal was one of the first recipients of that founding.

Governor Rays Home still stands today in the same location and we The Franklin County Citizens of Historic Preservation are in the process of acquiring this historic home.

Sincerely,

Sue Ferris, Vice President
Franklin County Citizens for Historic Preservation
3104 Snow Hill
West Harrison, IN 47060
